Bloodworks Northwest

Annual Report

JULY 1, 2025 – JUNE 30, 2026

2026

YOU MOVE OUR MISSION FORWARD

When you gave blood, money, or time to Bloodworks last fiscal year, you kept our mission in motion. In this Annual Report, celebrate your impact around the Pacific Northwest.

WHAT'S INSIDE:

2-3 COMMUNITY IMPACT – STATS AND STORIES
4-5 COMMUNITY IN ACTION – CAMPAIGNS, PROGRAMS, AND INITIATIVES
6-7 BOUND BY BLOOD – PARTNERSHIPS
11-13 LABS, BIO, RESEARCH INSTITUTE – SCIENTIFIC ADVANCEMENT
16 FINANCIALS – FINANCIAL STEWARDSHIP

VISIT OUR WEBSITE FOR A DIGITAL VERSION OF THIS REPORT.

LAST YEAR, BLOODWORKS LAUNCHED **MISSION IN MOTION** TO BRING BLOOD DONATION CLOSER TO WHERE PEOPLE LIVE, WORK, AND PLAY. HERE'S WHAT THIS AMAZING COMMUNITY HELPED THE CAMPAIGN ACCOMPLISH IN FY26:

ADDED **3** NEW VEHICLES
VISITED **63** ZIP CODES

COLLECTED **2,028** DONATIONS
SAVED UP TO **6,084** LIVES

HOSTED **157** BLOOD DRIVES
HOSTED **24** NEW GROUPS

BRINGING OUR MISSION TO LIFE

EVERY DAY, ACROSS THE PACIFIC NORTHWEST, BLOODWORKS' MISSION IS IN MOTION!

You can see it in donors who roll up their sleeve for the first time. In the patient receiving a lifesaving transfusion. In the volunteers, partners, and supporters who rally their communities to respond to the need for blood. What begins as one generous act creates a powerful ripple effect of hope, healing, and life itself.

This year, we moved our mission forward in exciting and meaningful ways. We launched new campaigns to inspire and welcome the next generation of blood donors. We opened the new Tacoma Donor Center, creating greater access and convenience for donors in the South Sound. We added new bloodmobiles to reach more donors where they live and work. We expanded blood services to additional local hospitals, helping ensure more patients receive the transfusion care they need when they need it most. And as the Pacific Northwest prepared to welcome World Cup soccer events, we strengthened and readied our blood supply to safeguard our community.

Those who join our mission carry forward a more than 80-year legacy built on enduring traditions of helping people help people and working for our common good together. These traditions are the foundation of our shared purpose, and they come to life through the values that guide us every day: integrity, ingenuity, courage, and generosity.

This report celebrates the lives touched, the communities strengthened, and the futures made possible through the collective efforts of many caring individuals. To our blood donors, blood drive organizers, financial supporters, partners, volunteers, and dedicated employees, thank you. Your commitment drives us forward. You inspire us with your generosity and remind us every day that extraordinary things are possible when we work together.

Kindly,

Curt Bailey

A BLOOD RECIPIENT STORY

Aches and pains are a natural consequence of sports for many athletes, even active teenage boys like Boden Clark. But when the sixteen-year-old lacrosse player went to the emergency room for severe pain, the reason stunned everyone: acute lymphoblastic lymphoma (ALL).

"The cancer cells had taken over my bone marrow and were literally pushing my bones from the inside out," Boden recalls. "My body could no longer produce healthy blood on its own. And that day, I received my first lifesaving blood transfusion." For the next three years, Boden received chemotherapy to fight this aggressive cancer.

Chemotherapy acts like a shotgun rather than a laser, casting a wide berth and taking down everything in its path. Not only had Boden's bone marrow stopped producing blood cells, the drugs saving his life were also attacking his healthy cells.

"Volunteer blood donors became an essential part of my care. During my first year of intensive chemotherapy alone, I received more than 30 blood and platelet transfusions."

Thanks to his medical team and the generosity of local blood donors, Boden received the support he needed to not just survive, but to thrive.

Today, Boden is a senior in college. He's back on the lacrosse field and holds gratitude for the many blood donors who saved his life.

"Looking back now, what amazes me the most is that every unit of blood I received came from someone who chose to give," Boden reflects. "Someone took time out of their day. Someone sat down on a donation chair and decided to help a stranger."

"I am forever grateful to the donors who I will never know, whose blood kept me alive and whose generosity gave me a second chance."

–BODEN CLARK, Blood Recipient

COMMUNITY IN ACTION

"The foundation of caring for a pet is giving. Donating blood is like giving something of yourself. You will never know where it will end up, but someone is really going to need that blood, and when they need it, there it will be. It's fabulous."

– LARS WULFF, Mud Bay Co-Founder

JULY 1, 2025–JUNE 30, 2026

6,568 BOUND BY BLOOD PARTNERS

25,422 FIRST TIME DONORS

71 HOSPITAL PARTNERS

GIVE BLOOD. RESCUE A HUMAN.

For the second year, Bloodworks partnered with **NEKO Cat Cafe, Seattle Humane, Oregon Humane Society, Blue Dog Bakery, DoveLewis, Mud Bay, Seattle Mariners Bark at the Park,** and creative partner **Henry** to inspire summer blood donations. By celebrating the special bond between people and their pets, the campaign reminded donors that every blood donation helps ensure local patients have the chance to return home to the moments that matter most, whether that's walking the dog, cuddling the cat, or simply spending more time with those they love. The result was a heartfelt community effort that helped raise awareness and supported a stable blood supply.

+ MUD BAY

MUSIC'S IN OUR BLOOD HITS A HIGH NOTE

In its fifth year, Music's In Our Blood brought blood donation's lifesaving impact center stage, inspiring more than **17,000 donations**, far surpassing the campaign's goal of 10,000 new and returning donors. Campaign highlights included blood drives with KEXP and Top Pot Doughnuts, plus collaborations with Sonic Guild, Sub Pop, SMASH, Ivar's, Three Magnets Brewing Co., Seattle Symphony, Marshall Hugh of Marshall Law Band, Fremont Fridays, and The Residency's 10-year anniversary celebration. By uniting artists, fans, businesses, and communities, we proved that **when music and generosity join forces, life keeps flowing.**

+ TOP POT DOUGHNUTS & COFFEE

10 TOP POT DOUGHNUTS BLOOD DRIVES

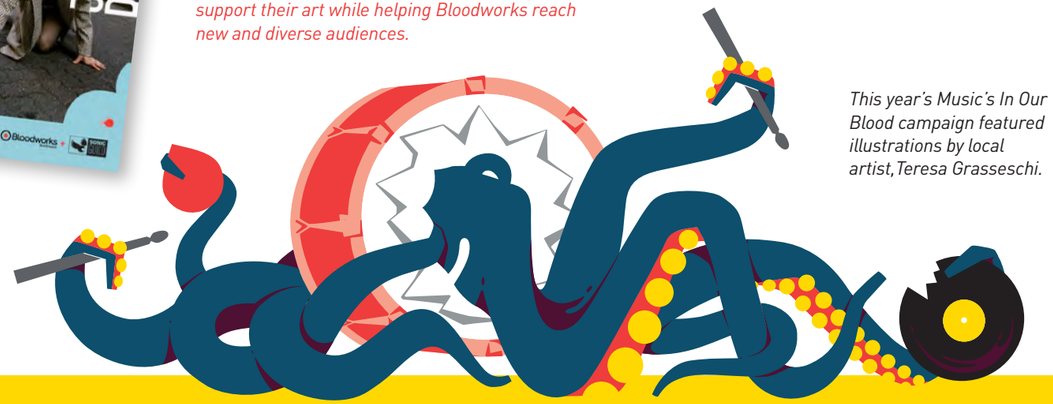

36 FIRST-TIME DONORS

161 REGISTERED DONORS

136 TOTAL UNITS COLLECTED

Amelia Day, Cumulus, Jul!et, Haley Johnsen, Tomo Nakayama, and Zan Fiskum — local Sonic Guild artists — shared their voices to amplify our lifesaving mission across the PNW. Each received a grant to support their art while helping Bloodworks reach new and diverse audiences.

This year's Music's In Our Blood campaign featured illustrations by local artist, Teresa Grasseschi.

TL;DR Insights

*In 2026, Bloodworks was honored to be recognized by the **Team of Champions**, a partnership between Boeing and the Seattle Seahawks to honor local community organizations.*

BOEING

BLOOD DRIVES: Boeing employees show up for local patients. Over the past year, Boeing hosted **86** blood drives across Puget Sound, resulting in **1,860** units of blood collected for patients in our community.

BOEING EMBODIES WHAT IT MEANS TO BE BOUND BY BLOOD. THROUGH DECADES OF BLOOD DRIVES, PHILANTHROPY, EMPLOYEE GIVING, AND VOLUNTEER LEADERSHIP, BOEING'S PARTNERSHIP TOUCHES EVERY PART OF THAT COMMITMENT.

PHILANTHROPY: Since 2000, the Employees Community Fund of Boeing Puget Sound has contributed nearly **$500,000** in support of Bloodworks' mission. Their financial support helps Bloodworks strengthen the programs, equipment, and infrastructure that make blood donation possible and ensure we can continue meeting the needs of local patients.

EMPLOYEE GIVING: Boeing also matched **$3,106** in employee giving last fiscal year, helping employees' generosity go even further.

LEADERSHIP: Kristy Hilden, who retired after more than 25 years with Boeing, currently serves as **Chair of Bloodworks Northwest's Board of Trustees,** continuing a tradition of Boeing employees investing their time and expertise in our mission.

It was all smiles at the Renton Donor Center when Seahawks Legend Jermaine Kearse visited Bloodworks and Boeing staff.
Left to Right: *Megan Watts, Sasha Seiden, Leah Hausman, Juan Cotto, Jermaine Kearse, and Harry Thomas*

"The Team of Champions is an opportunity to really recognize and thank nonprofit organizations for the work they are doing every day to help support our communities."

– LEAH HAUSMAN, Senior Community Investor, Boeing

BLOODWORKS IS ABOUT NEIGHBORS HELPING NEIGHBORS. WITH BOUND BY BLOOD PARTNERSHIPS, WE CAN KEEP LIFESAVING CARE CLOSE TO HOME.

IF YOU'RE INTERESTED IN BECOMING A BOUND BY BLOOD PARTNER, REACH OUT TO:

MOLLY DONAHUE
Director, Development
mdonahue@bloodworksnw.org

MISSION IN MOTION Every new vehicle and drive expands access, welcomes lifelong donors, and strengthens the blood supply. In the year ahead, Bloodworks will invest in its mobile fleet and raise philanthropic support to bring donors closer to saving lives in the Pacific Northwest.

WHAT HAPPENS WHEN WE BRING DONATION CLOSER?

At the start of Kirkland's City Hall for All event, just 13 people signed up to donate. But with the new bloodmobile parked right in the heart of the celebration, people took notice and stepped inside.

By day's end, participation had doubled, including 12 first-time donors. Among them were two police officers and a 16-year-old member of the city's youth advisory council making their first donations.

Moments like these are why proximity matters: bringing donation into familiar, trusted places opens the door to people who might otherwise never donate.

OUR FY26 MISSION IN MOTION FUNDING PARTNERS MADE BLOOD DONATION MORE ACCESSIBLE THAN EVER.

GIVE TO *MISSION IN MOTION.*
HELP MORE LOCAL DONORS HAVE ACCESS TO BLOOD DONATION IN THEIR COMMUNITY.

For more than 80 years, our expertise in blood has helped move medicine forward, from scientific discovery to better care for patients.

– CURT BAILEY, PRESIDENT & CEO

ON THE NEXT FEW PAGES, READ HOW OUR SCIENTISTS, LABORATORY EXPERTS, AND CELL THERAPY SPECIALISTS ARE ADVANCING WHAT'S POSSIBLE IN PATIENT CARE.

11 BLOODWORKS LABS – PRECISION TESTING, LIFESAVING IMPACT

12 BLOODWORKS RESEARCH INSTITUTE – DISCOVERY IN MOTION

13 BLOODWORKS BIO – ADVANCED THERAPIES IN ACTION

BLOODWORKS LABS

Across the globe, Bloodworks Labs transforms complex testing into lifesaving decisions for patients and the healthcare teams who care for them.

"When blood collection and laboratory medicine work together under one roof, we can deliver faster answers, more precise matches, and better care for patients."

– MIKE CHARAPATA,
Executive VP,
Laboratory Operations

Discovery of a New Blood Group Variant

IMMUNOHEMATOLOGY REFERENCE, PLATELET IMMUNOLOGY, AND GENOMICS LABS

Bloodworks Labs collaborates with leading researchers to advance the science of blood. This year, we helped identify a previously unknown blood group variant in partnership with UW Medicine, Fred Hutch Cancer Center, and others, with findings published in *Transfusion*.

Supporting Underserved Patients with Bleeding Disorders

BLEEDING DISORDERS LAB

Genetic testing can provide important answers for patients with bleeding disorders, but cost can put it out of reach. Through a nationwide partnership with the Hemophilia Alliance, Bloodworks provides testing for eligible patients who are uninsured and unable to afford it.

Advancing Transplant Diagnostics

HLA/IMMUNOGENETICS LAB

Precise testing is critical to matching donors and patients for transplant. Last year, we launched construction on new advanced sequencing technology that will provide higher-resolution HLA testing, giving transplant teams more detailed information to guide patient care.

Expanding Access to Care

BLOODWORKS LABS

Bloodworks Labs supports patient care well beyond our own walls. Last year, we added a new emergency department in Lynnwood and a cancer care center in Seattle, while new partnerships with blood centers in San Diego and Fresno, California, extended our expertise to more communities.

BLOODWORKS RESEARCH INSTITUTE

Scientific breakthroughs rarely happen overnight. They are built through years of asking questions, testing ideas, and following the evidence.

THIS YEAR, BLOODWORKS RESEARCHERS BROUGHT IMPORTANT WORK ACROSS THE FINISH LINE, PUBLISHING FINDINGS THAT DEEPEN OUR UNDERSTANDING OF BLOOD AND OPEN NEW POSSIBILITIES FOR PATIENTS.

Revealing a Potential Treatment for Sickle Cell Disease

DRS. JOSÉ LÓPEZ AND DOMINIC CHUNG published the most comprehensive study to date of the effects of the medication N-acetylcysteine, or NAC, in people with sickle cell disease. They found that high-dose NAC reversed several harmful changes in red blood cells, providing the basis for studies of NAC use during painful sickle cell crises.

Taking on Platelets' Short Shelf Life

Platelets are difficult to keep on the shelf because of their short shelf life. Cold storage could help them last longer and strengthen the supply. **DR. MORITZ STOLLA** completed a pilot clinical trial of cold-stored platelets in heart surgery patients, identifying adjustments needed before proceeding with a larger study.

What Pomegranates Can Teach Us About Blood Clotting

Blood clots save lives by stopping bleeding, but unwanted clots can cause heart attacks and strokes. **DR. MOUA YANG** and colleagues discovered how a naturally occurring compound found in pomegranates blocks a protein involved in clotting, providing new insight into how harmful blood clots might be controlled.

Finding a More Precise Way to Control Blood Clotting

Medicines used to prevent dangerous blood clots can also increase the risk of bleeding. **DR. XIAOYUN FU** and colleagues discovered a possible way to target harmful clotting more selectively, opening the door to future treatments that could prevent dangerous clots while allowing the body to stop bleeding when needed.

By publishing these findings, Bloodworks researchers give scientists around the world new knowledge to test, build upon, and ultimately use to advance science and save lives.

DR. JOSÉ LÓPEZ

DR. DOMINIC CHUNG

DR. MORITZ STOLLA

DR. MOUA YANG

DR. XIAOYUN FU

BLOODWORKS RESEARCHERS ARE INTERNATIONALLY RECOGNIZED FOR THEIR EXPERTISE IN BLOOD BIOLOGY AND TRANSFUSION MEDICINE. THEIR DISCOVERIES HAVE TRANSFORMED HOW WE TREAT BLOOD DISORDERS AND CONTINUE TO LAY THE GROUNDWORK FOR NEW TREATMENTS AND THERAPIES.

BLOODWORKS BIO

Advanced therapies harness cells from our blood to treat disease in new ways, like reengineering a patient's own cells to fight cancer. This year, Bloodworks Bio put years of investment to work, helping turn the promise of these groundbreaking therapies into progress for patients.

Bloodworks Apheresis BIOLOGICS & THERAPEUTICS

BLOODWORKS RESEARCH DONOR PROGRAM

THE FUTURE OF MEDICINE IS HERE. AND BLOODWORKS BIO IS HELPING MORE PATIENTS ACCESS IT.

Bloodworks Bio certified clean room boosts capabilities in supporting cancer research and advanced therapeutics.

BLOODWORKS' ROLE IN CAR-T THERAPY

One powerful example is CAR-T, an advanced therapy that takes immune cells from a patient's blood and reengineers them to recognize and fight their cancer.

This year, Bloodworks Bio expanded our role supporting an FDA-approved CAR-T therapy for patients with multiple myeloma, providing the highly specialized collection, processing, and preservation expertise needed to prepare each patient's cells for treatment.

FROM INVESTMENT TO IMPACT

Philanthropic support helped Bloodworks Bio build our first clean room, a highly controlled laboratory where cells can be safely prepared for use in advanced therapies. This year, we put it to work.

Now fully operational, the clean room allows our team to help move promising discoveries out of the research lab and closer to becoming treatments that can change patients' lives.

TREATMENT, CLOSER TO HOME

For some cancer patients, advanced therapies may offer their best hope for successful treatment, but accessing them isn't easy. Care may require waiting for an opening at a specialized treatment center far from home.

This year, Bloodworks Bio took an important step toward making these treatments more accessible, partnering with our first community oncology group to support CAR-T clinical trials and expand access to therapies in a community setting.

WHAT'S NEXT FOR CORD BLOOD

Collected from the umbilical cord after birth, cord blood contains blood-forming stem cells that can treat serious diseases. This year, Bloodworks celebrated two major advances:

BLOODWORKS CORD BLOOD DONATION PROGRAM

More Stem Cells From Every Donation

Bloodworks received FDA approval to use a manual processing method that recovers more blood-forming stem cells from each donation, making the most of every family's gift.

A New Disease We Can Treat

Cord blood can now be used to treat Krabbe disease, and Bloodworks has already distributed units for these patients.

Ongoing research around the globe is exploring cord blood's potential for cerebral palsy, stroke, and other neurological diseases. By continuing to bank cord blood today, Bloodworks is preserving these valuable units for what medicine makes possible tomorrow.

To the person who donated blood to me, I may never know who you are, but I want you to know how deeply grateful I am for the gift you gave me. Your generosity gave me more than blood — it gave me strength when I needed it most. Thank you for giving so selflessly and for making a difference in my life without ever expecting anything in return. I hope you know that your kindness truly matters.

With heartfelt gratitude,

– BLOOD RECIPIENT

Through Thank the Donor,™ blood recipients and their loved ones can send an anonymous, one-way message to their donors via email.

FROM THE CHAIR

DEAR FRIENDS OF BLOODWORKS NORTHWEST,

At Bloodworks, our mission has always been about people stepping forward to help others and communities uniting around a shared purpose. Our history is marked by service and innovation, but fulfilling our mission requires more than honoring that legacy. It requires us to anticipate what our communities will need next and to invest today in the capacity, relationships, and innovation that will carry us forward. This year, we continue in earnest our Mission in Motion initiative.

Mission in Motion is an investment in our infrastructure and our future. It supports donor growth and geographic expansion while giving us greater flexibility to go where the need and opportunity are greatest.

Our investment in new blood collection vehicles will bring our mission to more people. By expanding mobile blood drives and reaching new neighborhoods, we can make donation more accessible, welcome donors from communities that have had fewer opportunities to give, and build a stronger, more diverse blood supply. Each community we reach strengthens the network of donors, hospitals, patients, researchers, and partners that makes our mission possible.

None of this happens without you. Our donors give generously of themselves. Our financial supporters invest in what is possible. Our community and hospital partners open doors and help us reach more people. Our employees bring extraordinary dedication to this mission every day. Together, you keep Bloodworks moving forward.

Thank you for believing in this mission and helping us extend its reach. With new vehicles, donors, and communities ahead, our mission is truly in motion. Together, we are building a stronger blood supply for everyone who depends on it.

With gratitude,

KRISTY HILDEN

Bloodworks Northwest

BECAUSE OF THE **THANK THE DONOR PROGRAM**, FRIENDS, FAMILY AND PATIENTS CAN SAY THANKS FOR THE LIFESAVING BLOOD RECEIVED FROM DONORS IN OUR COMMUNITY.

I can't tell you how much I appreciate you taking the time to donate your blood. I was so low that walking across the room caused my heart to go crazy. When they tried to match my blood they couldn't find any here in Alaska. That is how special your blood is.

Thank you for donating your blood. I recently got into a car accident and I really appreciate you helping me get better!! Thank you from the bottom of my heart. May all your good deeds come back to you.

Hi! Thank you so much for your blood donation. I recently had a stem cell transplant and am still struggling to make new red cells. Your donation is helping to keep my RBCs a little bit higher, for which I am so grateful. I appreciate people like you who make the time to donate. Thank you!

Our entire family thanks you for your time and effort in donating blood! You are helping our dear dad, grandpa, and great grandpa thrive through cancer treatment! We are grateful for you!

Thank you for donating your blood to me. I had just had my baby, and hemmorhaged, losing a good amount of blood. This blood will help me stay alive for my babies.

I am so thankful for your donation! Blood transfusions have gifted me the last six months, and that's huge. In that time I graduated high school, went to a ren faire, added pink streaks to my hair, and got so many more moments with the people I love. THANK YOU.

Thank you! My daughter is using this blood and platelets donation in her fight with chemo against her brain tumor. Much love and appreciation!

We appreciate so much your kindness. Because of you, my daughter-in-law lives a better life with sickle cell. Thank you.

Thank you so much for your generous donation. I suffer from anemia of chronic disease due to cancer and your blood donation allows me to have the energy to spend time with my kids and family.

Thank you for your generous gift. I am 29 weeks pregnant with severe anemia. You saved me and you saved my baby. Because of you, help was available for us when we needed it. I can already feel the effects of the transfusion. I can't wait to go home to my family. Thank you.

Thank you so much for donating your platelets. My son is a 9 year-old leukemia patient and your donation is so important to his health, we don't know what we would do with it. We appreciate you so much.

I truly want to thank you for your generous support as I fight CML leukemia in blast crisis. Your kindness and encouragement mean more to me than I can put into words. Knowing that people like you are behind me gives me strength as I continue through treatment and work toward recovery. Thank you from the bottom of my heart.
